We were warmly welcomed by the happy faces of the inmates who hid all their pain of being separated from their dear ones behind those smiles. They were as excited and thrilled to meet us and spend time with us as much as we were. Every student was bought up teaching a saying 'sharing is caring', but these are the moments we realize why it is so important to share happiness, shower love and take care of the ones who need us the most. Our volunteers actively involved in different programs like singing, dancing, interacting with them and getting valuable advice from them. It was truly an eye opener and sheer pleasure to all of us. Financial aid to Sreerag

Sreerag is a student of our college belonging to the chemistry department. Post the Kerala Floods 2018, they lost their house and approached the Government for assistance to get back their shelter. It was then noticed that their land actually belonged to the government. And due to this their house cannot be built there. Another option was to get a house allocated by Government and they got it allocated at Kasaragod which was very far and was not possible to shift easily. After enquiring with different concerned authorities of any possible option they were informed that if they could manage to arrange a land Government would build house on that land. And for the same, Thavanish contributed 1 lakh rupees to Sreerag and his family for buying the land. 70000 rupees was given to Thavanish by the Alumni Association of 2007-10 Commerce batch and 30000 was arranged from Thavanish's fund. The cheques were handed over to Sreerag by the Principal, Vice Principals, Thavanish Coordinator Prof. Muvish Murali and other staff along with Thavanish volunteers at the Principal's office.
